

Amos | Connect

Get more out of Quercus with integrations that make your data work for you

Did your education institution invest in quercus?

This solution is popular amongst education institutions that are looking to improve their ability to manage the student experience, implement a powerful self-service solution, take advantage of analytics and reports, and scale the platform as they grow.

All of these features make Quercus a robust platform that's great for educational administrations looking to improve their flexibility.

But as feature-rich as Quercus is—the platform often doesn't work as intended unless you have the right integrations.

Meet Amos | Connect—an easier way to access and integrate your data in Quercus

Amos | Connect can help your organisation get the most out of Quercus by implementing powerful integrations that allow your systems to communicate, share data, and uplift the student experience.

The Amos team has decades of experience working in education. We understand how education administrations think, the types of problems they face, and the challenge of getting your systems fully integrated.

Are you having difficulties...

Configuring Quercus Live Link to work with your website, portal, and other integrations?

Enabling Quercus messages to go to multiple systems?

Monitoring and ensuring the reliability of your Quercus integrations?

Syncing Quercus Message Link with your existing systems?

Put our expertise to work to get the most value out of your Quercus investment

How can Amos | Connect help you overcome the black box that is Quercus?

Decades of Experience Building Quercus Integrations For Education

Quercus is only as good as the integrations that power it. [Amos | Connect](#) was designed specifically for educational institutions to help them get their data systems synced and communicating.

Create Efficient Integrations Between Your CRM and Quercus Message

A default Quercus implementation may require up to four messages to ensure that data has been sent to the right source. [Amos | Connect](#) reduces this problem, using messages and logic to present usable end points to your other campus systems.

Visualise your data flow with the Integration Dashboard

A default Quercus implementation may require up to four integration messages to ensure that data has been sent to the right source. [Amos | Connect](#) reduces this problem, using its API Library to present usable end points to your other campus systems.

Build Integrations That Enhance Your Workflows

Does your institution have a specific way that it likes to work? The Amos team will work with you to define the flow of your data, implement integrations that work with your processes, and support the connectors for you.

Unlock the power of Quercus Message Link

Getting your systems to communicate properly is a challenge. [Amos | Connect](#) simplifies Quercus Message Link by aggregating the message API through the use of connectors that connect to your other systems.

Amos will simplify how your institution interacts and drives value from Quercus

Are you ready to get more value out of your Quercus data? Contact an education specialist from Amos today to get started.
