

AMOS | CONNECT FOR TRIBAL SITS

Accelerate your journey to the SITS Cloud

Moving to SITS Cloud unlocks a unique opportunity to deliver wider benefits beyond those offered from the SITS Cloud service.

Expedite your migration while modernising your integrations

Moving to SITS Cloud unlocks a unique opportunity to deliver wider benefits beyond those offered from the SITS Cloud service. With the right integration partner, you can accelerate your transformation to a flexible, standards-based integration approach, giving your IT department the skills and resources needed to better respond and manage requests for change.

Amos | Connect is an end-to-end integration as a service solution which handles both legacy and modern integration methods. We help unlock the power of the SITS Stu-Talk component while taking ownership and responsibility of your data flow across multiple applications.

Make rapid progress as you move to SITS Cloud by leveraging a solution that brings together experts with a strong understanding of the university sector and integration technology.

A solution designed specifically for education institutions

Our integrations aren't generic. We've designed Amos | Connect specifically to solve major problems that have been affecting education administrations for decades.

Api-driven platform that drives connectivity

Accessing and processing data is your top priority. Our integration allows you to drive more value from your existing data, as well as unlock new data streams through improved business processes.

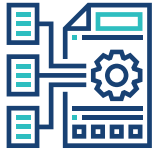

Flexible solution that can integrate with legacy systems

Your legacy systems are deeply embedded in your institution. We can work with and expand your legacy systems, giving you an agile solution that doesn't require complete change.

Leverage cloud-based and scalable technology

Your needs evolve over time, so does Amos | Connect. You can scale up your solution based on your actual needs. There's no need to pay for features you aren't ready to use.

We've got a feature for that

Powerful Integration Framework

A pre-built solution that's easy to implement, comes with support, and works with the SITS Stu-Talk component.

Education Data Model (EDM)

EDM works to translate data into a standardised language that is compatible with other solutions in your ecosystem.

API Hub

Access a wide variety of APIs that can streamline integration and provide connectivity with popular systems.

Cloud Infrastructure

Amos | Connect is a cloud native solution hosted on AWS and can integrate both cloud and on-premise systems.

End-to-End Encryption

Stay protected with a fully encrypted integration platform that keeps your data secure as it moves between your systems.

Real-Time Data Flow

Improve employee and student experiences with real-time data flow between the essential services in your system.

Enterprise Integrator

Our WSO2 Enterprise Integrator lets you control your data flows through an intuitive low-code integration solution for cloud and container-native projects.

Management Console

Highly visual console to manage and troubleshoot your integrations. If systems go offline, you can easily restart the message queue.

Drive more value from SITS & your essential systems - Connect with an Amos education expert today
